EXPERIENCE

06.2021 - present

HexOcean

Frontend Developer

- creating new components, with styles and unit tests
- creating email templates in HTML
- implementing new features and creating business logic
- conducting code reviews.
- performing refactoring, from small improvements to general refactoring
- fixing issues reported by the QA team
- directly contacting clients, agreeing on business requirements, and providing technical feedback
- clarifying requirements for new features to maintain project consistency
- managing the development team and providing new features

PROJECTS

- **Braintrust** - <https://app.usebraintrust.com/>

During this project, I gained hands-on experience building reusable and efficient components using React.js. This involved handling complex multi-step forms and writing comprehensive unit and integration tests. I actively participated in the application's development, including direct interaction with the client to gather requirements and feedback. I was responsible for delivering new features and iterations, and I honed my ability to accurately estimate the time needed to provide business value.

- **Braintrust Public Dashboard** - <https://info.app.usebraintrust.com/>

I played a key role in enhancing its performance. This involved a major refactoring effort, migrating the project from a legacy React codebase to a modern setup using Vite. I learned to effectively prioritize tasks to ensure the timely delivery of a high-performing application. My contributions included configuring the project, introducing Vitest for testing and writing the initial test suite, and developing new features and components

- **braintrust-ui-components** - Internal Component Library
- I contributed to the development of new, advanced components for use across the Braintrust ecosystem, including the main project and related applications. This involved writing clean, efficient code and comprehensive component tests. I also gained experience with Storybook during this project

SKILLS

- React.js
- Redux (Toolkit, Saga, RTKQ, redux-form)
- TypeScript
- JavaScript ES6
- HTML5 (Semantic & accessible)
- CSS3/SCSS (Flex, Grid, BEM, responsiveness)
- Next.js
- GraphQL
- Material-ui
- GIT
- Testing (Jest, React Testing Library, MSW)

PERSONALITY

- Communicativeness
- Team working
- Proactivity
- Focusing on goals
- Passion to new technologies

LANGUAGES

English - B2 level

HOBBIES

Sport and healthy life, learning new things, family and personal development
