- GraphQL
- Material-UI / Chakra-UI
- GIT
- Testing (Jest, React Testing Library)
- Micro-frontends
- Docker
- Expo

SKILLS

- Communicativeness
- Team working
- Focusing on goals
- Proactivity
- Passion to new technologies
- Fast learning
- Relationship Building
- Adaptability to changing environments
- Analytical Thinking

PROJECTS

Braintrust - https://app.usebraintrust.com/
During this project, I gained hands-on experience building reusable and efficient components using React.js. This involved handling complex multi-step forms and writing comprehensive unit and integration tests. I actively participated in the application's development, including direct interaction with the client to gather requirements and feedback. I was responsible for delivering new features and iterations, and I honed my ability to accurately estimate the time needed to provide business value.

jemWSzkole - https://jemwszkole.pl/
Leading the frontend development for a school meal management web application, I'm focused on its successful launch. My work includes bug fixes, UI improvements, code quality enhancements to reduce technical debt, and technical support for the business team. I'm committed to delivering a highquality product tailored to the needs of school staff.

Gainflow - soon in store
As the lead frontend developer, I'm responsible for the design and development of the user interface for the Gainflow mobile app. The app is built using React Native, Expo, and TypeScript. I designing and implementing intuitive and engaging user interfaces I optimizing the app for performance. I contributing to the product's business strategy and growt to achive success
